

## AIR MOVERS

### PART NO. VAF-3000

The VAF range of portable fans and ventilators from Rako are recognized as providing reliable and powerful industrial air moving equipment. General applications are to supply fresh air and fume removal from confined spaces and provide personnel heat stress relief.

### FEATURES

- Pneumatic version available for hazardous areas
- Wide range of fans and accessories available
- Designed to be robust, powerful, portable and easy to store
- Dual wall polyethylene body make the fan lightweight and easily manoeuvrable
- The standard VAF-3000 can move 3390m<sup>3</sup>/hr
- Polythene is corrosion free. Once you dent, chip or scratch a sheet metal fan, rust is inevitable  
The double wall polythene has a permanent high quality exterior finish

### DIMENSIONS:

Length: 440mm  
Width: 360mm  
Height: 540mm  
Impellor diameter: 295mm

### MOTOR SPECIFICATION:

110 or 230 volts, frequency 50 Hz, single phase  
Rated Power: 670 W  
Rev / Min: 2895

### WEIGHT:

16kgs

### ACCESSORIES:

A range of accessories are available for the VAF series fans including ducting and duct couplers.
